CTC Oil Coordination Node

Institutional Flows. Direct Access. Verified Refiners.

Our Position

We operate from Iran, aligned directly with national upstream allocation channels.

Our mission is simple:

Connect verified end-refiners directly to the Iranian authority, eliminating unnecessary speculation, markups, and middle layers.

What We're Looking For

We seek one trusted coordination partner — not multiple brokers — to introduce a serious, final-user refinery with the following qualifications:

- ◆ SPM or STS capability
- ◆ Experience with heavy/sour and light crude
- ◆ Non-USD settlement readiness (CNY, INR, barter, or USD)
- ◆ Review current crude availability: ctcoil.site/availability

Required Buyer Information

To initiate verification, please provide:

- Company profile
- LOI (Letter of Intent)
- Type of cargo
- Total requested volume
- First batch quantity
- Available lifting date

STS arrangement will be provided by the seller.

Once Verified

Ova İş Merkezi
Sanat Sokağı (Cumhuriyet Caddesi), Van,
Türkiye

Once Verified

We will facilitate:

- 📄 Direct documentation flow (export license, tank receipt, SGS)
- ⚓ Lifting from Kharg or Assaluyeh
- 🚢 STS or SPM transfer – Fujairah, Gulf of Oman, Southern Malaysia
- 🤝 Mutual NDA & institutional oversight
-

We bring the authority and the fleet.

You bring the refinery.

Together, we close the loop – directly, securely, and at scale.

Private Coordination

We do not exhibit at public trade shows.

However, our discreet Coordination Desks operate during major industry gatherings in Tehran, Shanghai, and Singapore.

If you or your team will attend an upcoming event and wish to schedule a private meeting –

to discuss SPM logistics, assay reviews, or non-USD settlement frameworks – please connect through:
